

Wainscott Weekly

December 23, 2016

Well that was a very very busy week. We all had a lot of fun. We started with a trip to the Gingerbread University which was great. I am sure that you all saw what a wonderful job the students did decorating. We also had several fun activities that we worked on including various crafts, games, scavenger hunts, pajama day, Polar Express, and songs. We also had a chance to finish two more countries and their traditions of Christmas. On Friday we had fun with a piñata to celebrate Mexican Christmas. It was all capped off with an awesome performance at the holiday sing. The performance seems to get better and better as the years go on. We hope you all have a safe and happy holiday and a terrific new year!

-Mark

What a fun and amazing week we have had! The students had a great time at Gingerbread University. They used their creativity and problem solving skills to create fun and interesting gingerbread men. We have visited a variety of countries and explored their Holiday traditions. We read great informational text about the different countries. We used the information we learned in this unit to compare and contrast the different traditions around the world. In math we created a Shape Santa and sorted shapes into a graph and used the information to answer questions. It was a fun and engaging activity. The children have worked hard on their Holiday Sing performance. I hope you enjoyed all their hard work.

I wish you a very Happy Blessed Holiday season and Healthy New Year!
