

Wainscott Weekly

May 6, 2016

This week we got right back into the swing of things. It was busy as usual with Mother's Day, play practice, the visit to the sewing society, and all the other projects we have been working on. They have worked very hard with their stories this week. In math we have all been working with money and counting change. If you get the chance let them try it at the store so that they can get some real life practice. In science we are studying plants and the kids are excited that their plants grew from before the break. We hope to replant them soon and eventually put them into our garden. Next week will be even busier with the Mother's Day breakfast on Monday and the field trip to Amber waves farm on Tuesday. I look forward to next week when the kids will work on their stories and continue practicing with using money. We will also work with the parts of the plant and start our state projects for social studies. It should be a great week. I hope you all have a wonderful weekend.

-Mark

Next Week

Monday 5/9 - Mothers Day Breakfast at 9 am
Tuesday 5/10 - Field Trip to Amber Waves Farm

Wow! I can't believe it is already May! The children have worked their way back into our routine after a wonderful spring break. There will be no more journal writing for homework for the first graders instead I would like everyone (K-1) to please do Raz-Kids for at least 15 minutes each night. Listening and reading stories is an integral part of building reading fluency. Take time out of your busy schedule and read with your child, you will be amazed at how much they have progressed this year, In math the First Graders worked with measurement by comparing lengths of various objects. The Kindergarteners explored shapes by composing and decomposing a varied of shapes. In Science we began our study of plants by exploring the various parts of plants.

Moms please remember our Mother's Day Bagel Breakfast will be on Monday, May 9th at 9:00 am. Please join us to celebrate MOMs.

Have a great weekend!

Kelly
