

Wainscott Weekly

March 31, 2017

This week marked the end of March and it couldn't have come any quicker. March is always a long month and with the weather being the way it has it made for us all to be off of our games. Nevertheless we still had some great learning going on. The second graders had worked on a new story about baseball but the theme was much deeper than that; it explained about having goals and working your hardest to reach your goals. It was a good lesson for them to learn. Meanwhile our third graders had to take the ELA state test. Although it was stressful for some they still all did fine and got through it. Next week we can get back to our normal schedule. In math we are working on fractions and money. The second graders will work next week on time while the third graders finish up fractions and move into measurement. I also plan to start using our Monday afternoons to teach multiplication to all of the students that need it. For Social Studies we are working on geography; specifically the United States and in Science we are studying dinosaurs; including names, fossils, and features of the animals. This will continue for the next few weeks. Next week will be our last before spring break. On Tuesday we will be going to Sagaponack for an Easter craft and egg hunt. Have an amazing weekend.

-Mark

COMING UP
April 4th - Visit Sagaponack School
April 10th - April 14th - No School
Spring Recess

I can't believe March has come and gone. I am hoping that warm weather is coming soon. The students have been working hard as we head closer to our Spring break. In math we have been working with place value by adding and subtracting tens. The Kindergarteners have worked with identifying shapes by vertices and sides. In Reading one group read a folktale called *Little Rabbit's Tale*. We learned that folktales teach a lesson. Another group read about *A Musical Day* with family and friends. We were able to summarize the story by sequencing their events. Another group worked with the consonant sounds of Vv. In Science we are continuing to work with dinosaurs. They have really enjoyed learning about the past and how dinosaurs lived a long time ago. In writing workshop we wrote about if we had a pet dinosaur and created a craft to illustrate our story.

Have a wonderful weekend! Have a great April Fool's Day!
